OSTONE

Calcium + Magnesium
Vitamin D3 & Zinc

BONES HEALTH SUPPORT

OSTONE is formulated to maximize calcium absorption. Calcium, Magnesium, Zinc with Vitamin D3 supplement is the ultimate blend for bone health.

CALCIUM

Important mineral which contributes to the maintenance of normal bones and teeth, as well as the normal function of digestive enzymes. Ensuring an adequate intake of calcium is vital in people of all ages, especially pregnant and breastfeeding women, women during & after the menopause and elderly men and women.

VITAMIN D3

Helps the body absorb calcium, which is crucial for healthy bones.

MAGNESIUM

Supports to regulate hundreds of enzyme systems in the body, including healthy muscle and nerve function.

ZINC

Essential mineral that plays numerous important roles in the body. It contributes to normal function of the immune system, as well as contributing to the normal maintenance of hair, skin, nails and vision.
