

Proteinat

Multivitamin + Minerals

Support Energy and Health

Heart and metabolism

Bones & Immunity

Proteinat is used for vitamins and minerals deficiencies caused by illness, pregnancy, poor nutrition, digestive disorders, certain medications, and many other conditions.

Proteinat has been especially developed for those who want to maintain optimum nutrition levels while training, who want to help support reproductive health, or help maintain general healthy and vitality in an otherwise hectic lifestyle.

Proteinat represents a simple solution, and advanced one a day tablet, unlike a general multivitamin.
